## Illustration

## Specifications

- Materials: PCTG, Aluminium Alloy
- Dimensions: 21.6 mm × 24.1 mm × 95.9 mm
- Net Weight: Approx. 53 g
- E-liquid Capacity: 2 ml
- Output power: 25 W
- Cartridge Specifications:
  - FeCrAl Meshed 0.6 Ω UWELL DILLON EM Integrated Coil Cartridge
  - FeCrAl Meshed 0.9 Ω UWELL DILLON EM Integrated Coil Cartridge
- Battery Capacity: 900 mAh

## Quick Guide

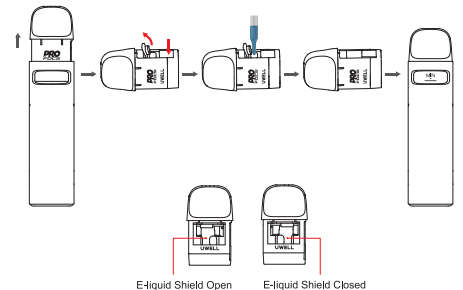

1. Take the cartridge off the device, then remove the insulating film from the bottom.
2. Open the filler plug to fill the cartridge with e-liquid, insert the cartridge back into the device, then wait for 10 minutes after its first filling.
3. Draw to vape.

## Instructions

### 1. Cartridge Filling and Replacement

- a. Take the cartridge off the new device for the first filling and remove the insulating film on the bottom of the cartridge before use.
- b. Press the childproof lock and open the filler plug, insert the nozzle of the e-liquid bottle into the filling port to fill it with the e-liquid.
- c. Put the filler plug back after filling.
- d. Insert the cartridge back into the device.

- e. For the cartridge replacement, please remove the used cartridge and insert a new one.

### Attention:

- a. Please put the filler plug back as soon as the filling is done, and make sure it is properly sealed to prevent e-liquid leakage.

- b. Please insert the new cartridge into the device and make the e-liquid shield open after the first filling, then let it sit for 10 minutes before use. If the e-liquid shield closed, the coil would be not completely soaked which will cause coil burning.
- c. Please make a timely refilling when the e-liquid is under the MIN level.

## 2. Vaping

Draw to vape.

## 3. Battery Level Indication

During vaping, the indicator flashes in green when the power is over 60%, flashes in blue when the power is about 30%-60%, and flashes in red when the battery is lower than 30%. When the indicator flashing in red 10 times indicates a low battery level, the device will stop outputting.

## 4. Charging

Connect the device to a power source through a Type-C charging cable, and then the indicator is on to indicate charging. The indicator flashing in red indicates low battery level, flashing in blue indicates medium battery level, and flashing in green indicates sufficient battery level. The indicator will stay lit in green when the charging is done.

## 5. Protection and Indication

- a. Short-circuit protection: When short-circuit occurs, the indicator flashes 3 times in red and the device will stop outputting.

- b. Low voltage protection: When the power is low, the indicator flashes 10 times in red during output and the device will stop outputting.
- c. Overtime protection: The indicator flashes 5 times in green to indicate an over 8-second vaping and the device will stop outputting.
- d. Open-circuit protection: When an open-circuit occurs under a no cartridge or disconnected situation, the LED indicator flashes 3 times in blue.
- e. Cartridge insertion indication: The indicator will flash in green twice when the cartridge is inserted into the device.
- f. Cartridge removal indication: The indicator will flash in blue twice when the cartridge is removed from the device.
- g. E-liquid shield malfunction indication: The indicator will flash 5 times in red and the device will stop outputting.

## ATTENTION:

- 1. Please charge with the certified power adaptor (5V/2A) and USB cable.
- 2. Please remove the pod from the device and store it separately when you travel by air, for the air pressure change may cause leakage.
- 3. Avoid high temperature, low temperature, flammables, explosives, water, and humid environment during the use or storage of the product. Please do not keep the product with hard objects to avoid damage. Please charge the device at least once a month.
- 4. Please keep the product away from a strong magnet environment, which will cause malfunction to the product.
